

Euron Platform Overview

AI-Powered Online Learning for the Next Generation of Engineers

About Euron

Euron (euron.one) is an AI-powered online learning platform designed to train the next generation of AI engineers, data scientists, and software developers. Founded with the mission to make cutting-edge AI education accessible, Euron offers structured bootcamps, live classes, and hands-on projects that take students from zero to production-ready.

Core Programs

- **AI Architect Mastery** — Advanced course covering RAG systems, fine-tuning LLMs, multimodal AI, and production deployment. Taught by industry practitioners with real-world case studies.
- **Zero-to-Production AI Engineering** — 19-week bootcamp building 8 production-grade AI products. Stack: FastAPI + Next.js + Supabase + LangGraph + Docker.
- **Full-Stack AI Development** — End-to-end course covering frontend (React/Next.js), backend (Python/FastAPI), databases, and AI integration.
- **LLM Fine-Tuning Lab** — Hands-on lab for fine-tuning Llama, Mistral, Falcon, and Qwen models using LoRA and QLoRA techniques.

Technology & Infrastructure

Euron provides its own API infrastructure (Euri API) at api.euron.one, which gives students access to state-of-the-art models including GPT-4o-mini, Gemini Embedding 2 Preview, and other leading models. The Euri API is fully OpenAI SDK compatible, making it easy to integrate into any project.

- **Euri API** — Unified API gateway for LLMs and embeddings (base URL: <https://api.euron.one/api/v1/euri>)
- **Models Available** — GPT-4o-mini, Gemini Embedding 2 Preview, Claude, and more
- **MCP Servers** — 8+ Model Context Protocol servers for advanced AI agent workflows

Key Features

- **Live Classes** — Weekend live sessions with expert instructors and real-time Q&A;
- **Project-Based Learning** — Every course includes building real, deployable products
- **Student Support** — Dedicated support team, community forums, and mentor access
- **Career Services** — Resume reviews, mock interviews, and job placement assistance
- **Certificates** — Industry-recognized completion certificates for all programs

Student Outcomes

Euron graduates have gone on to roles at leading tech companies and startups. The platform focuses on practical, production-ready skills rather than theoretical knowledge alone. Students build portfolios of 8+ deployed AI products during the bootcamp, giving them a significant advantage in the job market.
